

Survey Results & Analysis for Gender Specific & Women's Health Curriculum National Survey

TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER™
Laura W. Bush Institute *for Women's Health*

Friday, October 28, 2011
Powered by Vovici EFM

Executive Summary

This report contains a detailed statistical analysis of the results to the survey titled *Gender Specific & Women's Health Curriculum National Survey*. The results analysis includes answers from all respondents who took the survey in the 421 day period from Wednesday, July 21, 2010 to Thursday, September 15, 2011. 44 completed responses were received to the survey during this time.

Please answer the following questions about the role of women's health in your medical school. We propose the following definition of Women's Health: Screening, diagnosis and management of conditions that are

- Unique to women
- More common in women
-

More serious in women • Have manifestations, risk factors, or interventions that are different in women

	Yes	No	No, but we'd be interested in doing so
4-year WH Curriculum	15.9% (7)	65.9% (29)	18.2% (8)
4th Year Elective	56.8% (25)	34.1% (15)	9.1% (4)
Required WH Textbook	22.7% (10)	70.5% (31)	6.8% (3)
WH CME	58.1% (25)	32.6% (14)	9.3% (4)
WH Fellowship	15.9% (7)	79.5% (35)	4.5% (2)
WH Residency	25.0% (11)	63.6% (28)	11.4% (5)
WH OSCE/Simulations	79.1% (34)	14.0% (6)	7.0% (3)

Does your institution assess medical students' knowledge and attitudes of women's health?

Does your institution assess medical students' knowledge and attitudes of women's health?

If yes, in what years of the curriculum are such assessments performed? (Choose all that apply.)

If yes, in what years of the curriculum are such assessments performed? (Choose all that apply.)

Comment Responses:

ob/gyne clerkship
gender based medicine is a 4 year theme
2nd year there is a 6 week course for medical students entitled Reproduction and Gender Based Medicine.

Does your institution's clinical care facilities include a women's primary

care clinic?

Does your institution's clinical care facilities include a women's primary care clinic?

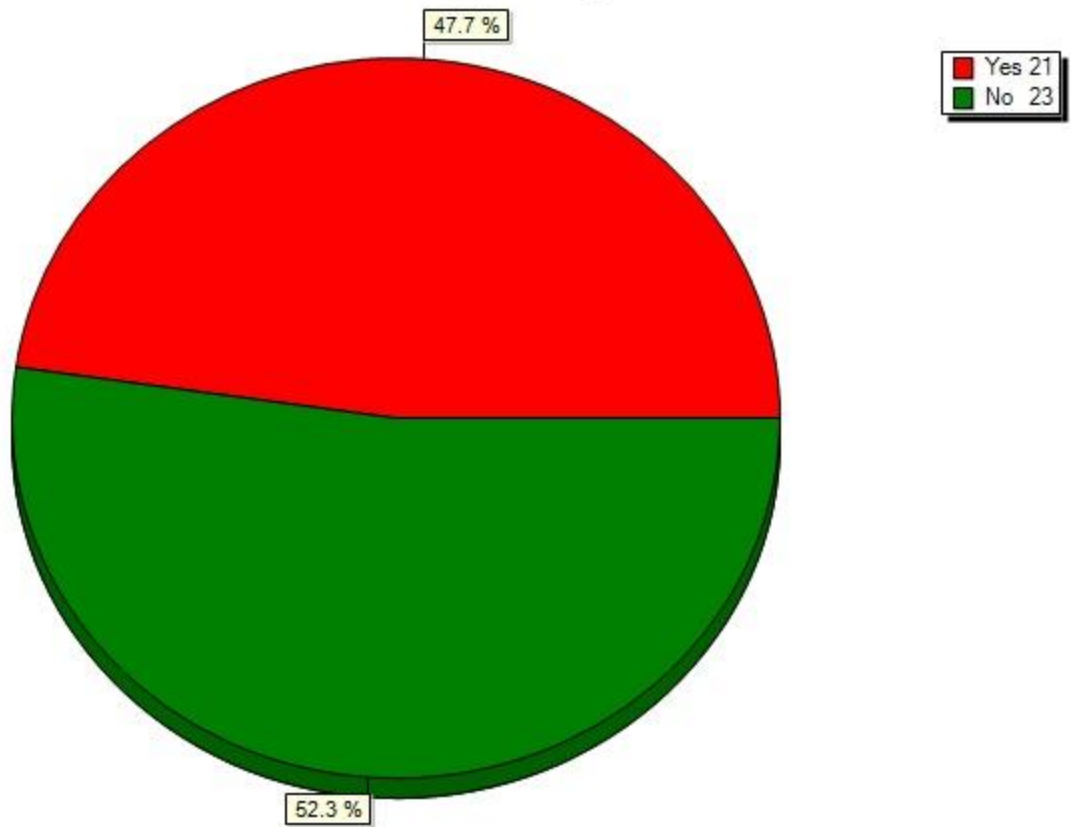

If yes, is this clinic used as a training site for medical students or residents?

If yes, is this clinic used as a training site for medical students or residents?

Does your school have a center, institute or other administrative entity dedicated to women's health?

Does your school have a center, institute or other administrative entity dedicated to women's health?

If yes, what type of entity is it?

If yes, what type of entity is it?

Center of Excellence in Women's H	8
Institute for Women's Health	3
Women's Health Research Center	5
Other	4

Please feel free to share any additional comments or questions that you may have.

several instances where a subject is taught in multiple years but there is no way to indicate that in this survey

Many of these are covered in both years 2 & 3. one in year 4, your program would not let me note that. I psicked the year where it was covered best

I am in the process of putting together an integrated curriculum, with plans to include women's health one of the threads.

We have no set lecture on fetal-alcohol syndrome but it is in their required reading for ob/gyne and is covered on their mandatory quiz. During board rounds on L&D drug and alcohol abuse in pregnancy are regular topics for discussion.

what is "pumonary" disorders in questions #15? did you mean pulmonary?

In our undergraduate curriculum, nearly all of the teaching objectives covered in this survey are introduced in a general manner. They are expanded upon at the graduate level to include more specific focuses that include women's health issues. From an objectives point of view, although there is a lot of introductory teaching that occurs in our curriculum, our faculty do further expand on the general introductions during class time. These "teachable moments" are not

officially tracked and therefore are not represented in this survey. We provide our faculty with resources to help them offer an inclusive, diverse sampling of examples and cases for their teaching that includes women's health issues. One such example is Gender and Health Collaborative Curriculum Project (<http://www.genderandhealth.ca/en/modules/>), which was funded by the Ontario Women's Health Council.

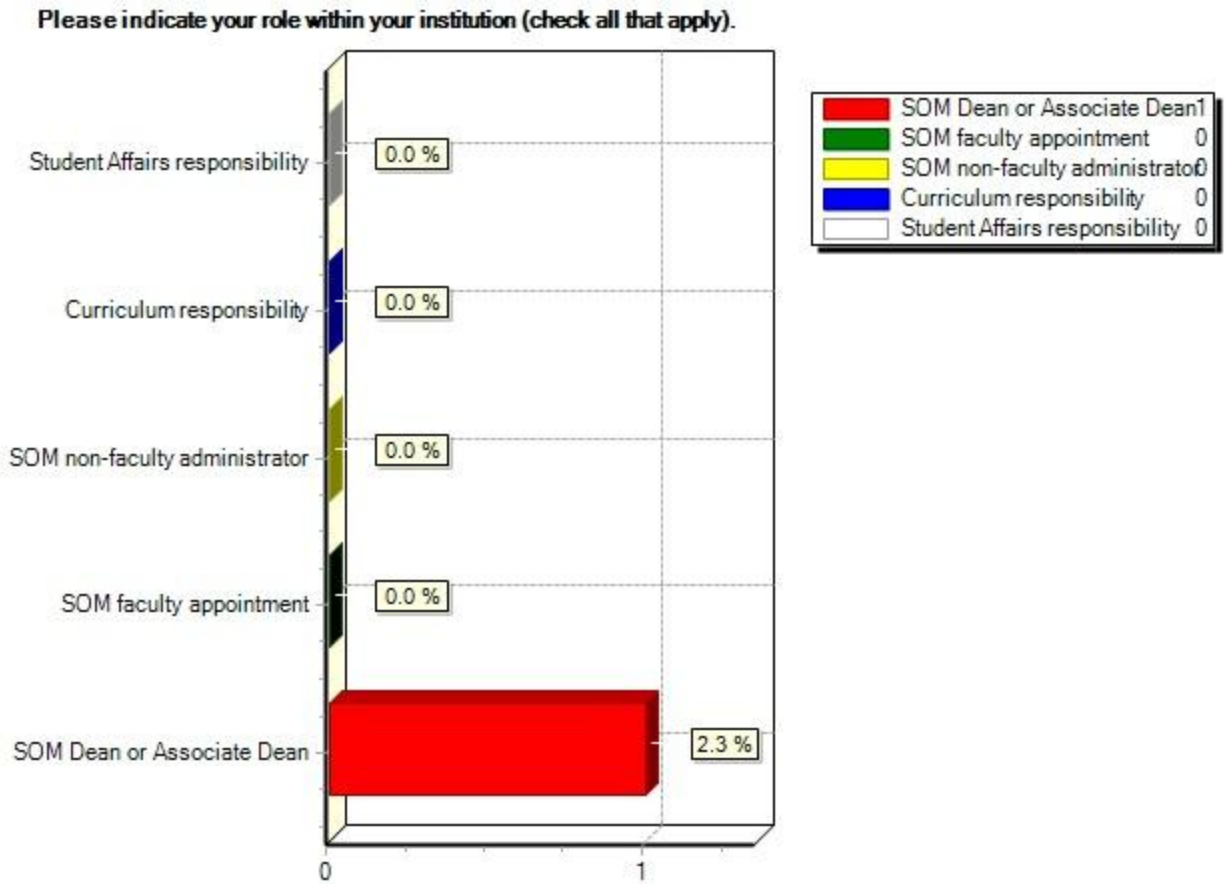

answer for #4 is 1 because we haven't yet graduated our first class, new medical school, survey required me to enter a number.

The survey would only allow me to mark one year. In many cases our lectures and small groups cross over several years

many of the above are covered in multiple years however the check boxes will allow only one year to be checked.

If you would like to be contacted regarding the results of this survey or would like to be involved in possible consortia projects, please give your name and e-mail address here.

Please indicate your role within your institution (check all that apply).
