

# Help Us with a Healthcare Intervention

# June 11th 11 AM

Capitol Steps, Washington, D.C.

**AMERICA'S FIREARMS  
INJURY EPIDEMIC IS  
A PUBLIC HEALTH  
EMERGENCY**

On June 11th, hundreds of doctors, nurses, students and other healthcare providers, gun owners and non gun owners, Democrats, Republicans and Independents will rally on the Capitol Steps in order to push Congress to **advance Firearms Injury Prevention Research.**

**Last year close to 40,000  
Americans, including more  
than 3000 children, died  
from firearms injuries.**

These deaths don't happen at random. We know we can prevent gun injuries through public health research and action. Lobbyists and special interest groups in Washington are pressuring lawmakers to quash bills supporting research to protect our patients from preventable injury and death.
